Subject: Brevis — early cost estimate

From: Finance Business Partner, Payments · Sent: 12 March 2026

Hi team,

Based on Brevis's indicative rate card shared on the intro call, my early estimate is that Brevis would be roughly **18% cheaper** than Arvanta on our blended rate (about 0.164% vs 0.20%).

This is before any formal quote, add-ons or contract terms, so please treat it as directional only.

Thanks

Legion Capital, Arvanta Payments, Brevis Pay, Sentrix Risk, Vireo Finance, Coral Bank and Tamra Bank are fictional.
